PROFESSIONAL SUMMARY

Highly motivated Python Developer with strong expertise in Python programming, Machine Learning, Data Analysis, and Natural Language Processing. Experienced in building intelligent systems using Scikit-learn, Pandas, NumPy, and SQL. Skilled in developing efficient, scalable, and AI-based solutions.

TECHNICAL SKILLS

- Python
- Machine Learning
- Data Analysis
- Natural Language Processing (NLP)
- NumPy
- Pandas
- Scikit-learn
- SQL
- Git
- Data Visualization
- Model Optimization

EXPERIENCE

Python Developer | AI Projects

- Developed machine learning models using Python and Scikit-learn.
- Performed data analysis on large datasets using Pandas and NumPy.
- Built NLP-based intelligent systems for automated resume screening.
- Optimized machine learning models for improved accuracy and performance.
- Used Git for version control and collaborative development.

- Worked with SQL databases for data extraction and analysis.

PROJECTS

Intelligent Resume Screening System

- Designed and implemented an AI-based resume screening system.
- Used TF-IDF vectorization and cosine similarity for resume matching.
- Automated candidate ranking based on job description relevance.
- Reduced manual screening time using machine learning techniques.

EDUCATION

Bachelor of Science in Computer Science

University Name

CERTIFICATIONS

- Machine Learning with Python
- Data Analysis using Python

ADDITIONAL INFORMATION

- Strong understanding of AI-driven recruitment systems
- Experience working with real-world datasets
- Passionate about building intelligent and automated solutions
